Connecting the World Through Pipeline Innovation & Resilient Energy Corridors

The International Pipeline Conference & Expo (IPCE) in Calgary is the premier gathering for pipeline professionals, innovators, and decision-makers from across the globe. Held in the heart of Canada's energy capital, this event offers a dynamic platform to explore the future of pipeline infrastructure, safety, digitalization, and energy transition. With a focus on cross-border collaboration and technical excellence, the conference brings together operators, engineers, regulators, contractors, and technology providers for five days of high-impact dialogue and discovery.

Delegates will gain exclusive access to cutting-edge insights on pipeline integrity, hydrogen and CO₂ transport, regulatory trends, and emerging technologies shaping the sector. The conference features keynote sessions from global industry leaders, technical panels, and hands-on workshops led by experts in pipeline safety, construction, and innovation. Whether you're advancing digital twin strategies, exploring hydrogen blending, or navigating ESG compliance, this is the place to connect with the people and ideas driving the industry forward.

The exhibition floor will host over 300 exhibitors showcasing the latest in pipeline materials, monitoring systems, robotics, technology and AI-driven solutions. Attendees will experience live demonstrations and interactive zones designed to foster learning and partnership. From large-scale EPC firms to emerging startups, the exhibition reflects the full spectrum of pipeline innovation and supply chain excellence.

Hosted biannually, the International Pipeline Conference & Expo in Calgary is a strategic forum where global expertise meets North American innovation. Whether you're driving infrastructure projects, advancing energy transition goals, or seeking new partnerships across borders, this event offers unmatched access to the people, technologies, and insights shaping the future of pipeline development and maintenance. With its unique blend of technical depth, commercial opportunity, and international collaboration, it's the essential destination for anyone committed to building resilient, pipeline networks.

The Expo

September 22-24, 2026

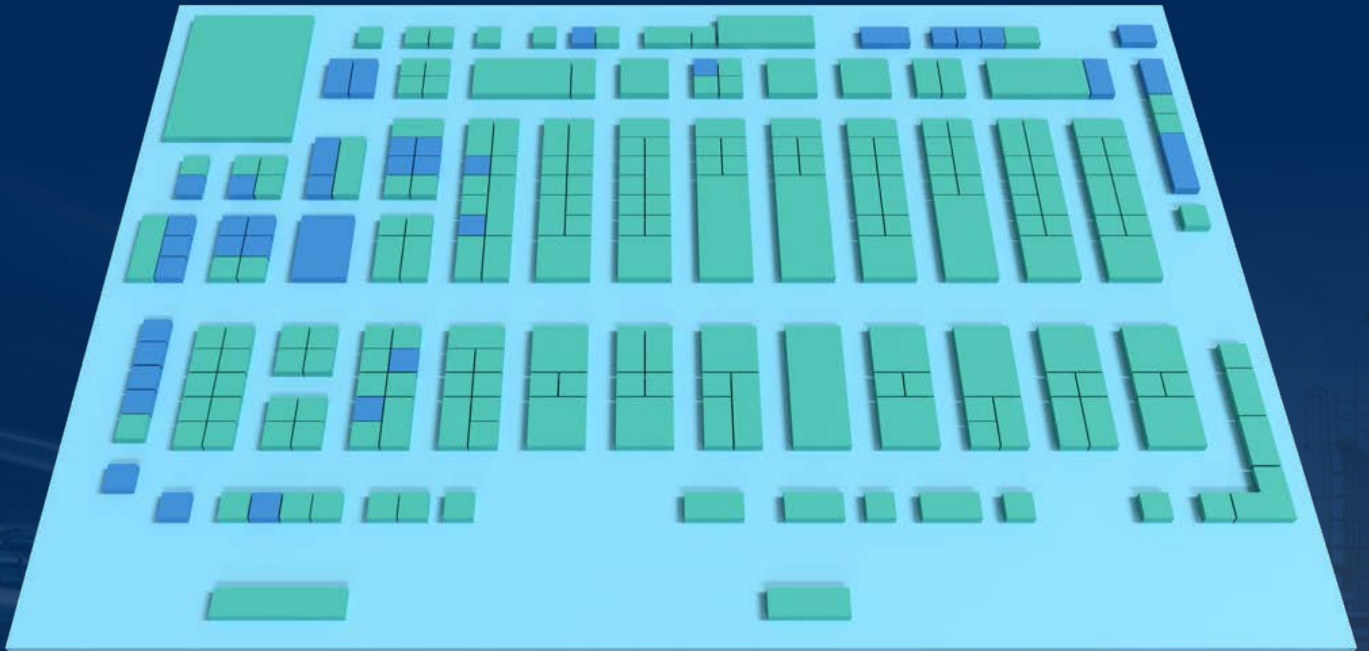

Join thousands of energy professionals at IPCE where attendees will experience a comprehensive showcase of the latest technologies, services and solutions driving the global pipeline industry forward. From advanced inspection tools and integrity management systems to trenchless construction equipment and digital twin platforms, the expo floor will feature over 300 exhibitors representing the supply chain.

The exhibition will feature interactive displays, expert-led sessions, and networking lounges designed to foster collaboration and knowledge exchange. Whether you're an operator exploring new asset management tools, a contractor seeking supply chain partners, or a policymaker tracking infrastructure trends, the exhibition offers a dynamic environment to connect, learn, and lead.

The Conference

Connecting Technology, People, and the Future

September 21-25, 2026

In September 2026, pipeline engineers from around the world will gather in Calgary for the 16th International Pipeline Conference and Expo (IPCE 2026). Organized by volunteers representing international energy corporations, energy and pipeline associations, and regulatory agencies, the IPCE has become internationally renowned as the world's premier pipeline conference.

IPCE 2026 will take place from Monday, September 21 – Friday, September 25, 2026 and will feature technical sessions, panels and tutorials and proceeds continue to support educational initiatives and research in the pipeline industry.

The International Pipeline Conference is designed to inform, enlighten and motivate!
